

LOCATION STUDIO®

Enhance rider experience with premium navigation

Comtech's vehicle navigation platform delivers a superior rider experience through customized features targeted to the motorcycle rider.

This simple, safe navigation system allows riders to focus on the road and enjoy the ride. The routing engine offers multiple routing options and lets riders select fastest, shortest or scenic route with the option to avoid toll roads, carpool lanes, ferries and highways. Guidance is delivered by natural voice instructions with real-life references and the ability to add multiple stops in one seamless route that can be shared with other riders.

Whether you're building a stand-alone built-in navigation system, integrating navigation into a mobile app, or need someone to build you a complete navigation experience, Comtech has solutions for you. Location Studio provides maps, navigation, search and enhanced local content via cross-platform APIs and SDKs for fast integration and customization. Comtech's TrustedOpenStreetMap solution includes relevant content like traffic, weather and POIs.

Enjoy the ride with:

- Scenic route for adventures riding
- Route selections by rider preference
- Bike and pedestrian routing
- Natural voice and lane guidance
- Global data and support
- One platform for on board, off-board and hybrid models
- Customizable map styles
- Multiple map data and POI sources
- Real time traffic and weather data

Location Studio® | Enhance rider experience with premium navigation

Key Benefits:

- **Trusted OpenStreetMaps – TOSM** is an economical and feature-rich immersive map experience. It is based on the data built by local, diverse and passionate community growing every day and keeping the data relevant. By cleaning, enhancing and integrating 3rd party data into OpenStreetMaps our team created a low-cost solution that can be added to web and mobile applications or any connected vehicle environment.
- **Geo Suite** – a complete search, mapping, navigation and geo-tracking platform with enhanced local content enables development of applications from simply displaying location on a map to a completed embedded turn by turn navigation and tracking for the connected vehicles and mobile devices.
- **Customized Solutions** – Location Studio is perfect platform for development of customized location-based applications and solutions. Based on two decades of the experience building navigation applications utilized by millions of users, we deliver cost effective, complete solutions tailored to unique customers' needs. We design our white-label location-based applications for easy configuration to best support customer's specific content and brand.
